What truly makes ESa special is **our people** and the communities we serve.

Being a part of ESa is about passion, not only for design but also for relationships. We take our role in shaping the built environment very seriously-understanding the impact our designs have on people and their communities. Regardless of design sector, our team seeks to improve and enrich the communities they work in by providing increased access, amenities and equity through design. We work closely with owners and community stakeholders to bring their collective visions to life.

In addition to designing for communities, we regularly give our time and resources to the following charities:

- American Heart Association (AHA)
- Architecture Construction Engineering (ACE) Mentor Program of America
- Habitat for Humanity
- Leukemia & Lymphoma Society (LLS)
- Love Helps
- Metro Nashville Public Schools Academies of Nashville (AN)
- Operation Stand Down
- Second Harvest Food Bank
- The Store
- United Way

ESa has undertaken pro-bono work for many nonprofit organizations in the Middle Tennessee area, including Pinson Hospital Hospitality House and the Nashville Zoo, and supports several charitable organizations including Love Helps and the annual fundraiser Gingertown. Whether it is by volunteering our design expertise or our time, we work together to create environments that positively shape lives and communities.

Members of our team also foster the future leaders of the A/E/C industry by participating in mentorship programs and outreach within the Nashville Public School system through the ACE program.
